PROFESSIONAL SUMMARY

Operations and systems professional with hands-on experience building internal tools, automating workflows, and improving reporting accuracy across distributed teams. Skilled at translating operational requirements into practical digital solutions that reduce manual work, strengthen compliance, and support data-driven decision-making.

WORK EXPERIENCE

Omnilert Food and Beverage

Operations Systems Analyst

Nov. 2023 – Present

Philippines · Remote

- Supported company operations by developing internal systems that improved **attendance monitoring, reporting accuracy, and compliance tracking** across multiple branches.
- Designed and implemented automated logging of daily transactions and flagged discrepancies requiring audit review, strengthening **financial control and accountability**.
- Developed a centralized attendance and time-tracking system to monitor employee check-ins, tardiness, and schedule compliance, supporting HR and operations management.
- Worked closely with management to translate operational requirements into structured digital solutions, reducing reliance on manual paperwork.
- Provided technical support for process improvements, helping streamline workflows and improve visibility across distributed operations.

Leviosa Philippines

Systems & Operations Coordinator

Sep. 2022 – Jun. 2024

Philippines · Hybrid

- Managed and maintained internal communication and reporting platforms to improve coordination between departments.
- Developed automated systems integrated with e-commerce platforms, improving order tracking, data accuracy, and operational efficiency.
- Prepared structured reports and presented technical and operational updates during weekly executive meetings, supporting informed decision-making.
- Assisted management in aligning system improvements with business and operational goals.
